Active Recombinant Full Length Human SNCA Pre-formed Fibrils Protein, Tag Free

Cat. No. SNCA-11261H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human Alpha-Synuclein Pre-formed Fibrils, Tag Free is expressed from E.coli cells. It contains AA Met 1-Ala 140 (Accession # P37840-1). This protein carries no "tag". Predicted N-terminus: Met 1
Species	Human
Source	E.coli
ProteinLength	1-140 aa
Description	Alpha-synuclein is a neuronal protein that plays several roles in synaptic activity such as regulation of synaptic vesicle trafficking and subsequent neurotransmitter release. It acts also as a molecular chaperone in its multimeric membrane-bound state, assisting in the folding of synaptic fusion components called SNAREs (Soluble NSF Attachment Protein REceptors) at presynaptic plasma membrane in conjunction with cysteine string protein-alpha/DNAJC5. Abnormalities in alpha-synuclein are implicated in the pathogenesis of Parkinson's disease (PD). Alpha-synuclein is present in Lewy-bodies, the neuropathological hallmark of PD, and the protein and its aggregation have been widely linked to neurotoxic pathways that ultimately lead to neurodegeneration.
Form	Supplied as 0.2 μm filtered solution in PBS, pH7.4 with trehalose as protectant.
Specificity	Sterility: Negative

Bio-activity	Thioflavin T emission curves show increased fluorescence (correlated to alpha-syn aggregation) over time when alpha-syn wild-type monomers are combined with tau wild-type Pre-formed Fibrils.
Molecular Mass	The protein has a calculated MW of 14.5 kDa.
Endotoxin	Less than 1.0 EU/μg by the LAL method/rFC method.
Purity	>90% as determined by SDS-PAGE.
Storage	This product is stable after storage at: The product should be stored at -70 centigrade or room temperature for short storage. Do not store fibrils on ice or at 4 centigrade; The unsonicated fibril is validated to be stable after storage at -70 centigrade for 1 year under sterile conditions; The sonicated fibril should be stored at -70 centigrade for not more than 8 weeks. Please avoid repeated freeze-thaw cycles.
Concentration	0.2 mg/mL
Shipping	This product is supplied and shipped with dry ice, please inquire the shipping cost.

GENE INFORMATION

Gene Name	SNCA synuclein, alpha (non A4 component of amyloid precursor) [Homo sapiens (human)]
Official Symbol	SNCA
Synonyms	SNCA; synuclein, alpha (non A4 component of amyloid precursor); PARK1, PARK4, Parkinson disease (autosomal dominant, Lewy body) 4; alpha-synuclein; alpha synuclein; NACP; PD1; synuclein alpha-140; non A-beta component of AD amyloid; PARK1; PARK4; MGC110988;
