

Recombinant Mouse Nucleobindin 2

Cat. No. Nucb2-1958M **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Mouse Nesfatin-1 (a.a. 25-106 of mouse nesfatin-1) was expressed in <i>E. coli</i> , 8 kDa.
Species	Mouse
Source	E.coli
Protein Length	25-106 a.a.
Description	Nesfatin-1, a polypeptide produced by cleavage of the NEFA/nucleobindin-2 (NUCB2), is a secreted protein, expressed in the appetite-control hypothalamic nuclei. Nesfatin is involved in the regulation of the feeding behavior. Intracerebroventricular injection of nesfatin-1 reduces body weight in rats by affecting the animal food intake.
Reconstitution	Centrifuge the vial prior to opening. Reconstitute with sterile water to a concentration of 0.1-1 mg/ml. Further dilutions should be made with medium containing 0.2% BSA.
Endotoxin	<0.1 EU/μg purified protein (LAL test).
Purity	>95% by SDS-PAGE.
Form	Lyophilized from PBS.
Storage Conditions	The lyophilized protein should be stored desiccated below 0°C. Stable for 6 months.

 45-1 Ramsey Road, Shirley, NY 11967, USA

Reconstituted Nesfatin-1 should be stored in working aliquots at -20°C. Avoid freeze/thaw cycles.

GENE INFORMATION

Gene Name	Nucb2 nucleobindin 2 [Mus musculus]
Synonyms	Nucb2; nucleobindin 2; Nefa; Calnuc; AI607786
Gene ID	53322
mRNA Refseq	NM_001130479
Protein Refseq	NP_001123951
UniProt ID	P81117
Chromosome Location	7 F1
Function	DNA binding; calcium ion binding
