

Recombinant Human WWOX, His-tagged

Cat. No. WWOX-525H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human WWOX fused with His tag at N-terminus produced in <i>E. Coli</i> is a single, non-glycosylated, polypeptide chain containing 254 amino acids (1-234 a.a.) and having a molecular mass of 28.3 kDa.
Species	Human
Source	E.coli
ProteinLength	1-234 a.a.
Description	WW domain-containing proteins are found in all eukaryotes and play an important role in the regulation of a wide variety of cellular functions such as protein degradation, transcription, and RNA splicing. This gene encodes a protein which contains 2 WW domains and a short-chain dehydrogenase/reductase domain (SRD). The highest normal expression of this gene is detected in hormonally regulated tissues such as testis, ovary, and prostate. This expression pattern and the presence of an SRD domain suggest a role for this gene in steroid metabolism.

PAGE.

Format

The WWOX solution (1mg/ml) contains 20mM Tris pH-8, & 10% glycerol.

Storage

WWOX although stable 4°C for 4 weeks, should be stored desiccated below -18°C.
For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA).
Please prevent freeze-thaw cycles.
