

Recombinant Human HADH, His-tagged

Cat. No. HADH-2032H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human HADH protein was expressed in <i>E.coli</i> and purified by using conventional chromatography techniques. MW=35.1 kDa (323aa).
Species	Human
Source	E.coli
Description	HADH, which belongs to the family of oxidoreductases, is important for converting certain fats to energy. This protein is an enzyme that catalyzes the chemical reaction. ((S)-3-hydroxyacyl-CoA + NAD ⁺ <=> 3-oxoacyl-CoA + NADH + H ⁺). It is also involved in a process called fatty acid oxidation, in which several enzymes work in a step-wise fashion to break down (metabolize) fats and convert them to energy.
