

Lutein

Cat. No. COP07 **Lot. No.** (See product label)

SPECIFICATION

Product Overview

Description

Lutein is a kind of natural carotenoids with important physiological function, which exists in some deep green vegetables and fruits such as broccoli, spinach, cabbage and kiwi fruit. Lutein can not be self-synthesized in human bodies, and can only be obtained from foods. Lutein and zeaxanthin(another type of carotinoid) are the important substances which exist in retina and macular. Harmful blue light which radiates from laptop screen, TV set, fluorescent lamp and sunlight could be absorbed by lutein, and the damage of macular caused by free radicals could be avoided, and the risk of cataract as well as that of AMD could be lowered.

Key Functions

1.Eyesight protectionReduction of retina injury caused by lightPrevention of cataract, AMD and blindness caused byAMD2.Anti oxidationScavenger of free radicals caused by light andself-metabolismInhibition of the lipid oxidation3.Anti cancerReduction of the cancer risk and inhibition of severalcancers4.Cardiovascular diseases prevention and improvementBlood fat regulationCardiovascular diseases risk reduction

Creative Biomart provides

Lutein CWSExcellent water dispersibility5% granularApplication: beverages, tablets, capsules and granularsBeadlets10%, 20%Application: tablets, capsules and premixLutein & Anthocyanins nano capsule premixCreative Biomart adopts the nano dispersion technology and develops Lutein & Anthocyanins Nano Capsule Formulation, which can be water dispersible and stable against light, heat and air. This formulation could improve bioavailability of lutein and anthocyanins, and the eye protection effect of this formulation is better than that from single use of either one.
