

Recombinant Human GABRQ 293 Cell Lysate

Cat. No. GABRQ-6055HCL **Lot. No.** (See product label)

SPECIFICATION

Product Overview

Species	Human
Source	HEK293
Description	Antigen standard for gamma-aminobutyric acid (GABA) receptor, theta (GABRQ) is a lysate prepared from HEK293T cells transiently transfected with a TrueORF gene-carrying pCMV plasmid and then lysed in RIPA Buffer. Protein concentration was determined using a colorimetric assay. The antigen control carries a C-terminal Myc/DDK tag for detection.
Components	This product includes 3 vials: 1 vial of gene-specific cell lysate, 1 vial of control vector cell lysate, and 1 vial of loading buffer. Each lysate vial contains 0.1 mg lysate in 0.1 ml (1 mg/ml) of RIPA Buffer (50 mM Tris-HCl pH7.5, 250 mM NaCl, 5 mM EDTA, 50 mM NaF, 1% NP40). The loading buffer vial contains 0.5 ml 2X SDS Loading Buffer (125 mM Tris-Cl, pH6.8, 10% glycerol, 4% SDS, 0.002% Bromophenol blue, 5% beta-mercaptoethanol).
Size	0.1 mg
Storage Instruction	Store at -80°C. Minimize freeze-thaw cycles. After addition of 2X SDS Loading Buffer, the lysates can be stored at -20°C. Product is guaranteed 6 months from the date of shipment.

 45-1 Ramsey Road, Shirley, NY 11967, USA

Applications ELISA, WB, IP. WB: Mix equal volume of lysates with 2X SDS Loading Buffer. Boil the mixture for 10 min before loading (for membrane protein lysates, incubate the mixture at room temperature for 30 min). Load 5 ug lysate per lane.

GENE INFORMATION

Gene Name GABRQ?gamma-aminobutyric acid (GABA) A receptor, theta [?Homo sapiens?(human)]

Official Symbol GABRQ

Synonyms GABRQ; gamma-aminobutyric acid (GABA) A receptor, theta; THETA; gamma-aminobutyric acid receptor subunit theta; GABA(A) receptor subunit theta

Gene ID 55879

mRNA Refseq NM_018558

Protein Refseq NP_061028

MIM 300349

UniProt ID Q9UN88

Chromosome Location Xq28

Pathway GABA A receptor activation, organism-specific biosystem; GABAergic synapse, organism-specific biosystem; Ion channel transport, organism-specific biosystem; Morphine addiction, organism-specific biosystem

Function

GABA-A receptor activity; chloride channel activity; extracellular ligand-gated ion channel activity
