| <b>Species</b>             | Human                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| <b>Source</b>              | HEK293                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| <b>Description</b>         | Antigen standard for cell division cycle 26 homolog ( <i>S. cerevisiae</i> ) (CDC26) is a lysate prepared from HEK293T cells transiently transfected with a TrueORF gene-carrying pCMV plasmid and then lysed in RIPA Buffer. Protein concentration was determined using a colorimetric assay. The antigen control carries a C-terminal Myc/DDK tag for detection.                                                                                    |
| <b>Components</b>          | This product includes 3 vials: 1 vial of gene-specific cell lysate, 1 vial of control vector cell lysate, and 1 vial of loading buffer. Each lysate vial contains 0.1 mg lysate in 0.1 ml (1 mg/ml) of RIPA Buffer (50 mM Tris-HCl pH7.5, 250 mM NaCl, 5 mM EDTA, 50 mM NaF, 1% NP40). The loading buffer vial contains 0.5 ml 2X SDS Loading Buffer (125 mM Tris-Cl, pH6.8, 10% glycerol, 4% SDS, 0.002% Bromophenol blue, 5% beta-mercaptoethanol). |
| <b>Size</b>                | 0.1 mg                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| <b>Storage Instruction</b> | Store at -80°C. Minimize freeze-thaw cycles. After addition of 2X SDS Loading Buffer, the lysates can be stored at -20°C. Product is guaranteed 6 months from the date of shipment.                                                                                                                                                                                                                                                                   |

**Applications**

ELISA, WB, IP. WB: Mix equal volume of lysates with 2X SDS Loading Buffer. Boil the mixture for 10 min before loading (for membrane protein lysates, incubate the mixture at room temperature for 30 min). Load 5 ug lysate per lane.

**GENE INFORMATION**
**Gene Name**

CDC26 cell division cycle 26 homolog (*S. cerevisiae*) [ *Homo sapiens* ]

**Official Symbol**

CDC26

**Synonyms**

CDC26; cell division cycle 26 homolog (*S. cerevisiae*); C9orf17, cell division cycle 26 , chromosome 9 open reading frame 17; anaphase-promoting complex subunit CDC26; ANAPC12; anaphase promoting complex subunit 12; APC12; CDC26 subunit of anaphase promoting complex; anaphase-promoting complex subunit 12; cell division cycle protein 26 homolog; C9orf17;

**Gene ID**

246184

**mRNA Refseq**

NM\_139286

**Protein Refseq**

NP\_644815

**MIM**

614533

**UniProt ID**

Q8NHZ8

**Chromosome  
Location**

9q32

**Pathway**

APC/C complex, organism-specific biosystem; APC/C complex, conserved biosystem; APC/C-mediated degradation of cell cycle proteins, organism-specific biosystem;

 Email: [info@creative-biomart.com](mailto:info@creative-biomart.com)  Fax: 1-631-938-8127

 45-1 Ramsey Road, Shirley, NY 11967, USA

APC/C:Cdc20 mediated degradation of Cyclin B, organism-specific biosystem;  
APC/C:Cdc20 mediated degradation of Securin, organism-specific biosystem;  
APC/C:Cdc20 mediated degradation of mitotic proteins, organism-specific biosystem;  
APC/C:Cdh1 mediated degradation of Cdc20 and other APC/C:Cdh1 targeted  
proteins in late mitosis/early G1, organism-specific biosystem;

**Function**

protein binding;
