

Recombinant Human Annexin A5, APC

Cat. No. ANXA5-2623H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human Annexin A5-APC is expressed in <i>E. coli</i> .
Species	Human
Source	E.coli
Description	Annexin 5 is a member of the annexin family of calcium-dependent phospholipid binding proteins. Annexin 5 is a phospholipase A2 and protein kinase C inhibitory protein with calcium channel activity and a potential role in cellular signal transduction, inflammation, growth and differentiation. In vitro studies have shown that Annexin 5 is a cellular protein which plays a role in the inhibition of blood coagulation by competing for phosphatidylserine binding sites with prothrombin. Through affinity assays Annexin 5 has been localized on cells that expressed phosphatidylserine on the cell surface, a feature found in apoptosis as well as other forms of cell death.
Purity	>98% pure as demonstrated by SDS-gel electrophoresis and reverse phase HPLC.
Molecular Weight	35.8 kDa.
Presentation	Solution containing 50 mM TRIS, 100 mM NaCl, 1% BSA, 0.02% Sodium Azide, pH 7.4.
Biological Activity	Annexin V exhibits anti-phospholipase activity and binds to phosphatidylserine (PS).

Application The fluorochrome allophycocyanin (APC) shows an excitation maximum of 650 nm and an emission maximum of 660 nm. Annexin V conjugated to APC is suitable for the detection of PS and allows simple secondary labelling by staining, for example, the membrane surface proteins with a monoclonal antibody for further cellular characterization.

Storage Stable at 2°-8°C as indicated on the label. Do not freeze!

GENE INFORMATION

Gene Name [ANXA5 annexin A5 \[Homo sapiens \]](#)

Synonyms ANXA5; annexin A5; PP4; ANX5; ENX2; anchorin CII; endonexin II; lipocortin V; placental anticoagulant protein I; Annexin-5; Annexin V; Lipocortin V; Endonexin II; Calphobindin I; Placental anticoagulant protein I; Placental anticoagulant protein 4; Thromboplastin inhibitor; Vascular anticoagulant-alpha; VAC-alpha; CBP-I; PAP-I

Gene ID [308](#)

mRNA Refseq [NM_001154](#)

Protein Refseq [NP_001145](#)

MIM [131230](#)

UniProt ID [P08758](#)

Chromosome Location 4q27

Function calcium ion binding; calcium-dependent phospholipid binding; eukaryotic cell surface
