

Recombinant Human Annexin A5, PE

Cat. No. ANXA5-2626H Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant Human Annexin A5-PE is expressed in <i>E. coli</i> .
Species	Human
Source	E.coli
Description	Annexin 5 is a member of the annexin family of calcium-dependent phospholipid binding proteins. Annexin 5 is a phospholipase A2 and protein kinase C inhibitory protein with calcium channel activity and a potential role in cellular signal transduction, inflammation, growth and differentiation. In vitro studies have shown that Annexin 5 is a cellular protein which plays a role in the inhibition of blood coagulation by competing for phosphatidylserine binding sites with prothrombin. Through affinity assays Annexin 5 has been localized on cells that expressed phosphatidylserine on the cell surface, a feature found in apoptosis as well as other forms of cell death.
Purity	>98% pure as demonstrated by SDS-gel electrophoresis and reverse phase HPLC.
Molecular Weight	35.8 kDa.
Presentation	Solution containing 50 mM TRIS, 100 mM NaCl, 1% BSA, 0.02% Sodium Azide, pH 7.4.
Biological Activity	Annexin V exhibits anti-phospholipase activity and binds to phosphatidylserine (PS).

 Tel: 1-631-559-9269 1-516-512-3133

 Email: info@creative-biomart.com  Fax: 1-631-938-8127

 45-1 Ramsey Road, Shirley, NY 11967, USA

Application	PE labelling allows simple direct detection of PS by FACS analysis. Counterstaining by propidium iodide allows the discrimination of apoptotic cells.
Storage	Stable at 2°-8°C as indicated on the label. Do not freeze!
GENE INFORMATION	
Gene Name	ANXA5 annexin A5 [Homo sapiens]
Synonyms	ANXA5; annexin A5; PP4; ANX5; ENX2; anchorin CII; endonexin II; lipocortin V; placental anticoagulant protein I; Annexin-5; Annexin V; Lipocortin V; Endonexin II; Calphobindin I; Placental anticoagulant protein I; Placental anticoagulant protein 4; Thromboplastin inhibitor; Vascular anticoagulant-alpha; VAC-alpha; CBP-I; PAP-I
Gene ID	308
mRNA Refseq	NM_001154
Protein Refseq	NP_001145
MIM	131230
UniProt ID	P08758
Chromosome Location	4q27
Function	calcium ion binding; calcium-dependent phospholipid binding; eukaryotic cell surface binding; phospholipase inhibitor activity; protein binding; receptor tyrosine kinase binding
