

Recombinant Human TRIM16 cell lysate

Cat. No. TRIM16-1822HCL **Lot. No.** (See product label)

SPECIFICATION

Product Overview

Species	Human
Description	This gene was identified as an estrogen and anti-estrogen regulated gene in epithelial cells stably expressing estrogen receptor. The protein encoded by this gene contains two B box domains and a coiled-coiled region that are characteristic of the B box zinc finger protein family. The proteins of this family have been reported to be involved in a variety of biological processes including cell growth, differentiation and pathogenesis. Expression of this gene was detected in most tissues. Its function, however, has not yet been determined.
