

Recombinant Human HUS1, His-tagged

Cat. No. HUS1-3364H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human HUS1 protein, fused to His-tag at N-terminus, was expressed in <i>E.coli</i> and purified by using conventional chromatography. MW = 33.8 kDa (300aa).
Species	Human
Source	E.coli
Description	HUS1 is a component of an evolutionarily conserved, genotoxin-activated checkpoint complex. This protein associates with Rad9 and Rad1 to form the 9-1-1(RAD9-RAD1-HUS1) complex, which localizes to DNA lesions and promotes DNA damage signaling and repair or apoptosis, cell cycle arrest. The trimeric complex is structurally similar to the proliferating cell nuclear antigen (PCNA) sliding clamp and interacts with Rad17 as a clamp-clamp loader pair during the DNA damage response.
Form	Liquid. In 20 mM Tris-HCl Buffer (pH 8.0) containing 100 mM NaCl, 40% Glycerol.
Purity	> 95% by SDS - PAGE.
Concentration	0.25mg/ml (determined by Bradford assay).

CNIVNNKM VHFDLLHEDV SLQYFIPALS.

Storage

Can be stored at +4°C short term (1-2 weeks). For long term storage, aliquot and store at -20°C or -70°C. Avoid repeated freezing and thawing cycles.
