

Recombinant Human SLC5A1, GST-tagged

Cat. No. SLC5A1-2775H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human SLC5A1(1 a.a. - 664 a.a.), fused with GST-tag at N-terminal, was expressed in wheat germ.
Species	Human
Source	Wheat Germ
Description	This gene encodes a member of the sodium-dependent glucose transporter (SGLT) family. The encoded integral membrane protein is the primary mediator of dietary glucose and galactose uptake from the intestinal lumen. Mutations in this gene have been associated with glucose-galactose malabsorption. Multiple transcript variants encoding different isoforms have been found for this gene.
