

Irregular silica Gel Chromatography

Cat. No. Silica-45AC **Lot. No.** (See product label)

SPECIFICATION

Product Overview

The adsorbent is an irregularly shaped, homogeneous silica gel matrix with a narrow, well-defined particle distribution for high separating performance and permeability with good reproducibility, meanwhile it is a proven, highly successful packing material providing fast, effective and reproducible separations. It is one of the most reliable sorbents used in High Performance Liquid Chromatography (HPLC) and medium pressure chromatography.
