

Native GOAT Gamma Globulin Fraction

Cat. No. IgG-335G **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Goat Gamma was prepared from normal goat serum by a multi-step process which includes delipidation and salt fractionation followed by extensive dialysis against the buffer stated above. Assay by immunoelectrophoresis resulted in precipitin arcs against anti-Goat Serum corresponding to gamma globulins.
Species	Goat
Description	Goat gamma globulin blocking reagent is an ideal blocker for western blotting, ELISA, Immunohistochemistry and other detection assays. Gamma globulins are a class of globulins, identified by their position after serum protein electrophoresis. The most significant gamma globulins are immunoglobulins ("Igs"), more commonly known as antibodies, although some Igs are not gamma globulins, and some gamma globulins are not Igs. Globulin is one of the three main types of serum proteins, the others being albumin and fibrinogen.
Form	Lyophilized
Applications	ELISA, WB, IHC, IF
Usage	This product is for research use only and is not intended for therapeutic or diagnostic applications. Please contact a technical service representative for more information. All properties listed are typical characteristics and are not specifications. All suggestions and data are offered in good faith but without guarantee as conditions and methods of use of our products are beyond our control. All claims must be made

within 30 days following the date of delivery. The prospective user must determine the suitability of our materials before adopting them on a commercial scale.

Storage

Store gamma globulin at 4°C prior to restoration. For extended storage aliquot contents and freeze at -20°C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4°C as an undiluted liquid. Dilute only prior to immediate use.

Concentration

10 mg/mL by UV absorbance at 280 nm

Storage Buffer

0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2

Preservative

0.01% (w/v) Sodium Azide

Reconstitution

Restore with deionized water (or equivalent)

Shipping

Ambient
