

## Recombinant Human TRIB2 protein

**Cat. No.** TRIB2-3078H    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                                      |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Human TRIB2 protein(NP_006204.1) (Met 1-Asn 343) was expressed and purified in Insect Cells, with additional two amino acids (Gly & Pro) at the N-terminus.              |
| <b>Species</b>          | Human                                                                                                                                                                                |
| <b>Source</b>           | Insect Cells                                                                                                                                                                         |
| <b>ProteinLength</b>    | 1-343 aa                                                                                                                                                                             |
| <b>Form</b>             | Lyophilized from sterile 50mM Tris, 100mM NaCl, 0.5mM PMSF, pH 8.0.                                                                                                                  |
| <b>Molecular Mass</b>   | The recombinant human TRIB2 consists of 345 amino acids and predicts a molecular mass of 39 kDa. It migrates as an approximately 43 kDa band in SDS-PAGE under reducing conditions.  |
| <b>Endotoxin</b>        | < 1.0 EU per µg of the protein as determined by the LAL method.                                                                                                                      |
| <b>Purity</b>           | > 82 % as determined by SDS-PAGE                                                                                                                                                     |
| <b>Storage</b>          | Store it under sterile conditions at -20°C to -80°C upon receiving. Recommend to aliquot the protein into smaller quantities for optimal storage. Avoid repeated freeze-thaw cycles. |
| <b>Reconstitution</b>   | It is recommended that sterile water be added to the vial to prepare a stock solution of                                                                                             |
