

Recombinant Human T-complex 1, His-tagged

Cat. No. TCP1-2851H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human TCP1 protein, fused to His-tag at N-terminus, was expressed in E.coli and purified by using conventional chromatography. MW = 62.5 kDa (576aa) confirmed by MALDI-TOF.
Species	Human
Source	E.coli
Description	TCP1 is a molecular chaperone that is a member of the chaperonin containing TCP1 complex (CCT), also known as the TCP1 ring complex (TRiC). This protein is found in the cytosol as a subunit of a hetero-oligomeric chaperone. It has an important function in maintaining cellular homoeostasis by assisting the folding of many proteins, including the cytoskeletal components actin and tubulin.
