

Recombinant Human NAPA, His-tagged

Cat. No. NAPA-2815H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human NAPA protein, fused to His-tag at N-terminus, was expressed in E.coli and purified by using conventional chromatography. MW =35.3 kDa(315aa), confirmed by MALDI-TOF.
Species	Human
Source	E.coli
Description	NAPA is one of the SNAP (Soluble NSF Attachment Protein) family. SNAPs, acting in concert with SNAREs (SNAP receptors) and the N-ethylmaleimide-sensitive fusion protein (NSF), are required for the fusion of transport vesicles to their target membranes in synaptic transmission, intra-Golgi transport, endosome-to-endosome fusion and transcytotic vesicles-to-plasma membrane transport. This protein mediates the binding of NSF and thus the formation of a 20S fusion particle. It is expressed in all mammalian tissues.

Purity	> 95% by SDS - PAGE.
Form	Liquid. In 20 mM Tris-HCl Buffer (pH 7.5) containing 10% Glycerol.
Concentration	1 mg/ml (determined by Bradford assay).
Storage	Can be stored at +4°C short term (1-2 weeks). For long term storage, aliquot and store at -20°C or -70°C. Avoid repeated freezing and thawing cycles.

GENE INFORMATION

Gene Name	NAPA N-ethylmaleimide-sensitive factor attachment protein, alpha [Homo sapiens]
Synonyms	NAPA; N-ethylmaleimide-sensitive factor attachment protein, alpha; SNAPA; alpha-soluble NSF attachment protein; SNAP-alpha; alpha-SNAP; alpha SNAP; N-ethylmaleimide-sensitive factor attachment protein alpha
Gene ID	8775
mRNA Refseq	NM_003827
Protein Refseq	NP_003818
MIM	603215
UniProt ID	P54920
Chromosome Location	19q13.33
Pathway	Membrane Trafficking
