

Recombinant Human TES, His-tagged

Cat. No. TES-2782H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human TES protein (1-421aa), fused to His-tag at N-terminus, was expressed in E.coli and purified by using conventional chromatography techniques.
Species	Human
Source	E.coli
ProteinLength	1-421 a.a.
Description	TES is a tumor suppressor protein and may play role in cell adhesion, cell spreading and in the reorganization of the actin cytoskeleton. This protein localizes to cell-cell contacts and actin stress fibres, and interacts with a variety of cytoskeletal proteins including Zyxin, Mena, VASP, Talin and Actin. The ability of TES to associate with alpha-actinin, paxillin and Zyxin is dependent on the conformational state of the molecule.
