

Recombinant Human Acyl-CoA Thioesterase 13, His-tagged

Cat. No. ACOT13-2819H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human ACOT13, fused to His-tag at N-terminus, was expressed in E.coli and purified by using conventional chromatography techniques. MW = 17.1 kDa (160aa), confirmed by MALDI-TOF.
Species	Human
Source	E.coli
Description	Acyl-coenzyme A thioesterase 13, also known ACOT13, belongs to the thioesterase s ubfamily of esterase family. Highly expressed in kidney with moderate expression in brai n, liver and intestines, ACOT13 contains a hotdog-fold and is thought to co-localize wi th microtubules, possibly playing a role in cellular proliferation events. Deletion of a po rtion of the q arm of chromosome 6 is associated with early onset intestinal cancer, su ggesting the presence of a cancer susceptibility locus.
