

## Purified Mouse IgE Reference Standard

Cat. No. IgE-43M    Lot. No. (See product label)

### SPECIFICATION

|                         |                                                                                                                                                               |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Hybridoma derived IgE producing cells were grown in tissue culture and the secreted IgE protein was immunoaffinity purified from tissue culture supernatants. |
| <b>Species</b>          | Mouse                                                                                                                                                         |
| <b>Form</b>             | Liquid                                                                                                                                                        |
| <b>Usage</b>            | For Research Use Only, NOT for Diagnostic Use. For In Vitro Use Only. Not for Human or Animal Consumption.                                                    |
| <b>Storage</b>          | 4°C                                                                                                                                                           |
| <b>Concentration</b>    | 1.0 mg/mL                                                                                                                                                     |
| <b>Preservative</b>     | 0.1% sodium azide                                                                                                                                             |
