

Recombinant Human Neuregulin 2

Cat. No. NRG2-2695H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human Neuregulin 2 is expressed in <i>E. coli</i> . MW= 44kDa.
Species	Human
Source	E.coli
Description	This gene encodes a novel member of the neuregulin family of growth and differentiation factors. Through interaction with the ERBB family of receptors, this protein induces the growth and differentiation of epithelial, neuronal, glial, and other types of cells. The gene consists of 12 exons and the genomic structure is similar to that of neuregulin 1, another member of the neuregulin family of ligands. The products of these genes mediate distinct biological processes by acting at different sites in tissues and eliciting different biological responses in cells. This gene is located close to the region for demyelinating Charcot-Marie-Tooth disease locus, but is not responsible for this disease. Alternative transcript variants encoding distinct isoforms have been described.
Species Reactivity	Human, Mouse.
Applications	Western Blotting (as a positive control); Stimulation of Tyrosine Kinase Activity of Erbs(1nM; More potent than Heregulin α1); Cell Proliferation and Differentiation (1nM)(For 1nM concentration, dilute 1μg of stock protein to 33 ml of culture medium).
Supplied As	Purified Heregulin β1 is packaged in physiological saline, pH 7.4, with 0.2% BSA.

 45-1 Ramsey Road, Shirley, NY 11967, USA

Note that this product is supplied without Sodium azide or any other preservative.

Storage

Store vial at -20°C to -70°C. When stored at the recommended temperature, this protein is stable for 24 months.

GENE INFORMATION
Gene Name

NRG2 neuregulin 2 [Homo sapiens]

Synonyms

NRG2; neuregulin 2; DON1; HRG2; NTAK; OTTHUMP00000198728; divergent of neuregulin-1; neural- and thymus-derived activator for ErbB kinases; pro-NRG2; pro-neuregulin-2, membrane-bound isoform

Gene ID

9542

mRNA Refseq

NM_001184935

Protein Refseq

NP_001171864

MIM

603818

UniProt ID

O14511

Chromosome Location

5q23-q33

Pathway

ErbB signaling pathway

Function

growth factor activity; receptor binding
