

Human Factor-VIII

Cat. No. F8-3065H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human Factor VIII produced from Human Plasma is effective in the correction and prevention of severe bleeding episodes attributed to Factor VIII deficiency. The Factor-VIII is purified by proprietary chromatographic techniques.
Species	Human
Source	Human Plasma
Description	Coagulation factor VIII participates in the intrinsic pathway of blood coagulation; factor VIII is a cofactor for factor IXa which, in the presence of Ca ²⁺ and phospholipids, converts factor X to the activated form Xa. This gene produces two alternatively spliced transcripts. Transcript variant 1 encodes a large glycoprotein, isoform a, which circulates in plasma and associates with von Willebrand factor in a noncovalent complex. This protein undergoes multiple cleavage events. Transcript variant 2 encodes a putative small protein, isoform b, which consists primarily of the phospholipid binding domain of factor VIIIc. This binding domain is essential for coagulant activity. Defects in this gene results in hemophilia A, a common recessive X-linked coagulation disorder.
Physical Appearance	Sterile Filtered White lyophilized (freeze-dried) powder.
Formulation	The lyophilized protein 200IU/ml was lyophilized from a sterile solution containing 1.5% Glycine, 160mM Calcium chloride and 25mM NaCitrate and 25mM NaCl.
Solubility	It is recommended to reconstitute the lyophilized Factor-VIII in sterile

18MΩ-cm H₂O at a concentration of 200IU/ml, which can then be further diluted to other aqueous solutions. Make sure that the vial has reached room temperature prior to its reconstitution, otherwise it might precipitate.

Stability

Lyophilized Factor-VIII although stable at room temperature for 1 week, should be stored desiccated between 2-8°C. Upon reconstitution Factor-VIII should be stored at 4°C.

Biological Activity

The potency per mg was tested and found to be 150 Units/mg.

Human Virus Test

The plasma is collected from donors with Hepatitis B vaccinated. Each unit of plasma has been tested for HBsAg, Anti-HIV-1/2 plus O and Anti-HCV by using the imported kits which are approved by Federal Drug Administration (FDA).

Usage

Creative BioMart's products are furnished for LABORATORY RESEARCH USE ONLY. The product may not be used as drugs, agricultural or pesticidal products, food additives or household chemicals.

GENE INFORMATION

Gene Name

F8 coagulation factor VIII, procoagulant component [Homo sapiens]

Synonyms

F8; coagulation factor VIII, procoagulant component; AHF; F8B; F8C; HEMA; FVIII; DXS1253E; coagulation factor VIII; factor VIII F8B; coagulation factor VIIIc; antihemophilic factor

Gene ID

2157

mRNA Refseq

NM_000132

Protein Refseq

NP_000123

MIM	306700
UniProt ID	P00451
Chromosome Location	Xq28
Pathway	Complement and coagulation cascades; Hemostasis
Function	copper ion binding; metal ion binding; oxidoreductase activity; protein binding
