

Recombinant Human DYNLRB2 protein, His-tagged

Cat. No. DYNLRB2-3424H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human DYNLRB2(1-96aa) fused with His tag at N-terminal was expressed in E. coli.
Species	Human
Source	E.coli
ProteinLength	1-96 a.a.
Description	DYNLRB2, also known as dynein light chain roadblock-type 2, acts as one of several non-catalytic accessory components of the cytoplasmic dynein complex that are thought to be involved in linking dynein to cargos and to adapter proteins that regulate dynein function. Cytoplasmic dynein acts as a motor for the intracellular retrograde motility of vesicles and organelles along microtubules.
