

Mouse Anti-Human MRP1 Monoclonal Antibody

Cat. No. CAB-905MH **Lot. No.** (See product label)

SPECIFICATION

Product Overview

Species	Human
Source	Mouse
Specificity	Human multidrug resistance-associated protein 1
Clonality	Monoclonal
Positive Control	Breast tumors
Staining Pattern	Cytoplasmic, Cell membrane
Specificity Note	The MRP molecule, an integral membrane glycoprophosphoprotein belonging to the same superfamily of ATP-binding cassette transmembrane transporter proteins as P-glycoprotein, is overexpressed in many P-glycoprotein-negative, multidrug resistant cell lines and tumours. It is believed that the main function of MRP in drug resistance is that of a plasma membrane drug efflux pump.
Applications	Formalin-fixed paraffin-embedded tissue, or IHC frozen sections. No antigen retrieval necessary.
Recommended Usage	IHC test, research use only. Incubate with samples at RT for 60min or at 4°C overnight.

 Tel: 1-631-559-9269 1-516-512-3133

 Email: info@creative-biomart.com  Fax: 1-631-938-8127

 45-1 Ramsey Road, Shirley, NY 11967, USA

Storage 2-8°C for 12 months.

GENE INFORMATION

Gene Name MRP1 Multidrug resistance-associated protein-1 [Homo sapiens]

Synonyms MRP1; ATP-binding cassette, sub-family C (CFTR/MRP), member 1; MRP; multidrug resistance associated protein 1; GS-X; Leukotriene C(4) transporter; ATP-binding cassette sub-family C member 1; multidrug resistance-associated protein 1; multiple drug resistance-associated protein; ABC29; ABCC; DKFZp781G125; multiple drug resistance protein 1; DKFZp686N04233; multidrug resistance protein

Gene ID 4363

mRNA Refseq NM_004996.3

Protein Refseq NP_004987.2

MIM 158343

UniProt ID P33527

Chromosome Location 16p13.1

Function ATP binding;ATPase activity;ATPase activity, coupled to transmembrane movement of substances;hydrolase activity;nucleotide binding;transporter activity
