

Recombinant Human DTYMK, His-tagged

Cat. No. DTYMK-3562H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human DTYMK protein, fused to His-tag at N-terminus, was expressed in E.coli and purified by using conventional chromatography techniques (1-212aa).
Species	Human
Source	E.coli
Description	DTYMK is also known as thymidylate kinase family and is involved in pyrimidine metabolism. Specifically, DTYMK catalyzes the ATP-dependent conversion of dTMP (deoxythymidine monophosphate) to dTDP (deoxythymidine diphosphate), which then functions as one of the four nucleotides in DNA. Via its role in the catalytic creation of dTDP, DTYMK plays an important role in the pathway of DNA synthesis and is thought to be involved in cell cycle progression and cell growth.
Form	Liquid. In 20mM Tris-HCl buffer(pH 8.0) containing 20% glycerol, 2mM DTT, 0.1M NaCl.
Molecular Mass	26 kDa (232aa), confirmed by MALDI-TOF
Purity	> 95 % by SDS-PAGE
Concentration	1 mg/ml (determined by Bradford assay)
