

Recombinant Human Phosphomannomutase 1, His-tagged

Cat. No. PMM1-1422H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	PMM1 Human Recombinant fused with a 20 amino acid His tag at N-terminus produced in E.Coli is a single, non-glycosylated, polypeptide chain containing 282 amino acids (1-262 a.a.) and having a molecular mass of 31.9 kDa. The PMM1 is purified by proprietary chromatographic techniques.
Species	Human
Source	Human
ProteinLength	1-262 a.a.
Description	PMM1 is an enzyme involved in the synthesis of the GDP-mannose and dolichol-phosphate-mannose required for a number of critical mannosyl transfer reactions. PMM1 catalyzes the conversion between D-mannose 6-phosphate and D-mannose 1-phosphate which is a substrate for GDP-mannose synthesis. GDP-mannose is used for the synthesis of dolichol-phosphate-mannose, which is crucial for N-linked glycosylation and accordingly the secretion of several glycoproteins as well as for the synthesis of glycosyl-phosphatidyl-inositol (GPI) anchored proteins.
Form	The PMM1 solution (0.5 mg/ml) contains 20 mM Tris-HCl buffer (pH 8.0), 10% glycerol, 2 mM DTT, 100 mM NaCl and 0.1 mM PMSF.
Purity	Greater than 90.0% as determined by SDS-PAGE.
Physical Appearance	Sterile Filtered colorless solution.

Storage

PMM1 should be stored desiccated below -18°C. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA). Please prevent freeze-thaw cycles.

GENE INFORMATION

Gene Name

PMM1 phosphomannomutase 1 [Homo sapiens]

Official Symbol

PMM1

Synonyms

PMM1; phosphomannomutase 1; Sec53; phosphomannomutase 1; PMM 1; PMMH-22; OTTHUMP00000198843; brain glucose-1,6-bisphosphatase

Gene ID

5372

mRNA Refseq

NM_002676

Protein Refseq

NP_002667

MIM

601786

UniProt ID

Q92871

Chromosome

22q13

Location	
Pathway	Amino sugar and nucleotide sugar metabolism; Asparagine N-linked glycosylation; Biosynthesis of the N-glycan precursor (dolichol lipid-linked oligosaccharide, LLO) and transfer to a nascent protein; Fructose and mannose metabolism; Metabolic pathways; Metabolism of proteins; Post-translational protein modification; Synthesis of GDP-mannose; Synthesis of substrates in N-glycan biosynthesis
Function	isomerase activity; metal ion binding; phosphomannomutase activity
