

Recombinant Human Proteasome (Prosome, Macropain) Activator Subunit 2 (PA28 Beta), His-tagged

Cat. No. PSME2-1288H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human PSME2 protein, fused to His-tag at N-terminus, was expressed in E.coli and purified by using conventional chromatography.
Species	Human
Source	Human
Description	PSME2, also known as proteasome (prosome, macropain) activator subunit 2, is an IFN-gamma inducible proteasome activator required for presentation of certain major histocompatibility (MHC) class I antigens. Downregulation of PSME2 results in abnormal proteasome activation and has been implicated in the development of intimal hyperplasia (IH) in animal models.
