

Recombinant Human SNX5, His-tagged

Cat. No. SNX5-45H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human SNX5, fused to His-tag at N-terminus, was expressed in E.coli and purified by using conventional chromatography techniques.
Species	Human
Source	E.coli
Description	SNX5 also known as sorting nexin-5, is a member of the sorting nexin family. Members of this family contain a phox (PX) domain, which is a phosphoinositide binding domain, and are involved in intracellular trafficking. This protein is a component of the mammalian retromer complex, which facilitates cargo retrieval from endosomes to the trans-Golgi network. It has also been shown to bind to the Fanconi anemia, complementation group A protein.
Form	Liquid. In phosphate buffered saline (pH7.4) containing 20% glycerol, 1mM DTT.
Molecular Mass	49.2kDa (427aa) confirmed by MALDI-TOF.
