

Recombinant Human MMP7 protein, His-tagged

Cat. No. MMP7-47H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human MMP7(95-267aa) fused with His tag was expressed in E. coli.
Species	Human
Source	E.coli
ProteinLength	95-267 a.a.
Description	MMP7 also known as Matrilysin. MMP7 belongs to the matrix metalloproteinase (MMP) family, which are involved in the breakdown of extracellular matrix in normal physiological processes, such as embryonic development, reproduction, and tissue remodeling, as well as in disease processes, such as arthritis and metastasis. MMP7 protein enhanced the phosphorylation of p38 and ERK mitogen-activated protein kinases. MMP7 has directly functional target of miR-148a, participating in cell invasion.
