

Recombinant Human MIF, His-tagged

Cat. No. MIF-81H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human MIF, fused to GST-tag at N-terminus, was expressed in E.coli and purified by using conventional chromatography techniques.
Species	Human
Source	E.coli
Description	MIF also known as Macrophage migration inhibitory factor. MIF has been identified to be secreted by the pituitary gland and the monocyte/macrophage and to play an important role in endotoxic shock. MIF has the unique property of being released from macrophages and T cells in response to physiological concentrations of glucocorticoids. The secretion of MIF is tightly regulated and decreases at high, anti-inflammatory steroid concentration.
Form	Liquid. In Phosphate Buffered Saline(pH7.4) containing 10% glycerol
Molecular Mass	39.2kDa (345aa) confirmed by MALDI-TOF
