

Recombinant Human EZR Protein, MYC/DDK-tagged, C13 and N15-labeled

Cat. No. EZR-190H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	EZR MS Standard C13 and N15-labeled recombinant protein (NP_001104547) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	The cytoplasmic peripheral membrane protein encoded by this gene functions as a protein-tyrosine kinase substrate in microvilli. As a member of the ERM protein family, this protein serves as an intermediate between the plasma membrane and the actin cytoskeleton. This protein plays a key role in cell surface structure adhesion, migration and organization, and it has been implicated in various human cancers. A pseudogene located on chromosome 3 has been identified for this gene. Alternatively spliced variants have also been described for this gene. [provided by RefSeq, Jul 2008]
