

Recombinant Human TPO Protein, His-tagged

Cat. No. TPO-1487H Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant human thyroid peroxidase protein produced in SF9 is a glycosylated, polypeptide chain containing 834 amino acids. The TPO is expressed with a -6xHis tag and purified by proprietary chromatographic techniques.
Species	Human
Source	Insect cells
Description	Thyroid Peroxidase (TPO) represents one of the main autoantigenic targets in autoimmune thyroid disease of humans. Its identity with the formerly so-called `microsomal antigen` has been shown several years ago. As an integral membrane glycoprotein it is restricted to the apical plasma membrane of the follicular epithelial cells and comprises two identical subunits of approx. 100 kDa molecular weight. The hemoprotein TPO plays a key role in the thyroid hormone biosynthesis by catalysing both the iodination of tyrosyl residues and the coupling of iodotyrosyl residues in thyroglobulin (TG) to form precursors of the thyroid hormones T4 and T3.
Molecular Mass	92,872 Dalton (excluding glycosylation), 101 kDa total mass.
Purity	Greater than 95% as determined by SDS-PAGE.
Storage	Store at 4 centigrade if entire vial will be used within 2-4 weeks. Store, frozen at -20 centigrade for longer periods of time. Avoid multiple freeze-thaw cycles.
