

Recombinant Human Angiotensinogen, His&GST-tagged

Cat. No. AGT-2183H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human Angiotensinogen(Arg35~Ala485), fused with two N-terminal Tags, His-tag and GST-tag, was expressed in Prokaryotic expression.
Species	Human
Source	E.coli
ProteinLength	35-485 a.a.
Description	The protein encoded by this gene, pre-angiotensinogen or angiotensinogen precursor, is expressed in the liver and is cleaved by the enzyme renin in response to lowered blood pressure. The resulting product, angiotensin I, is then cleaved by angiotensin converting enzyme (ACE) to generate the physiologically active enzyme angiotensin II. The protein is involved in maintaining blood pressure and in the pathogenesis of essential hypertension and preeclampsia. Mutations in this gene are associated with susceptibility to essential hypertension, and can cause renal tubular dysgenesis, a severe disorder of renal tubular development. Defects in this gene have also been associated with non-familial structural atrial fibrillation, and inflammatory bowel disease.
Form	Supplied as lyophilized form in PBS, pH7.4, containing 5% trehalose, 0.01% sarcosyl.
Molecular Mass	76.7kDa
AA Sequence	The target protein is fused with two N-terminal Tags, His-tag and GST-tag, its

Applications SDS-PAGE; WB; ELISA; IP.

Stability The thermal stability is described by the loss rate of the target protein. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvious degradation and precipitation were observed. The loss of this protein is less than 5% within the expiration date under appropriate storage condition.

Storage Avoid repeated freeze/thaw cycles. Store at 2-8°C for one month. Aliquot and store at -80°C for 12 months.
