

# Recombinant Human ENDOU lysate

**Cat. No.** ENDOU-463HCL    **Lot. No.** (See product label)

## SPECIFICATION

|                            |                                                                                          |
|----------------------------|------------------------------------------------------------------------------------------|
| <b>Product Overview</b>    | Over-expression cells lysed in RIPA buffer and lysate supplied in SDS loading buffer     |
| <b>Species</b>             | Human                                                                                    |
| <b>Source</b>              | HEK293                                                                                   |
| <b>Molecular Mass</b>      | 50225.50Da                                                                               |
| <b>Recommended Usage</b>   | WB                                                                                       |
| <b>Storage Instruction</b> | Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C. |

## GENE INFORMATION

|                        |                                                                                                                                                                                                                         |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Gene Name</b>       | ENDOU endonuclease, polyU-specific [ Homo sapiens (human) ]                                                                                                                                                             |
| <b>Official Symbol</b> | ENDOU                                                                                                                                                                                                                   |
| <b>Synonyms</b>        | ENDOU; P11; PP11; PRSS26; endonuclease, polyU-specific; poly(U)-specific endoribonuclease; protein endoU; 22 serine protease; 26 serine protease; placental protein 11; uridylate-specific endoribonuclease; EC 3.1.-.- |
| <b>Gene ID</b>         | 8909                                                                                                                                                                                                                    |
