

## Recombinant Human RNF217 lysate

**Cat. No.** RNF217-548HCL    **Lot. No.** (See product label)

### SPECIFICATION

|                            |                                                                                          |
|----------------------------|------------------------------------------------------------------------------------------|
| <b>Product Overview</b>    | Over-expression cells lysed in RIPA buffer and lysate supplied in SDS loading buffer     |
| <b>Species</b>             | Human                                                                                    |
| <b>Source</b>              | HEK293                                                                                   |
| <b>Molecular Mass</b>      | 35334.83Da                                                                               |
| <b>Recommended Usage</b>   | WB                                                                                       |
| <b>Storage Instruction</b> | Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C. |

### GENE INFORMATION

|                        |                                                                                                                                                                                                                                                                  |
|------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Gene Name</b>       | RNF217 ring finger protein 217 [ Homo sapiens ]                                                                                                                                                                                                                  |
| <b>Official Symbol</b> | RNF217                                                                                                                                                                                                                                                           |
| <b>Synonyms</b>        | RNF217; ring finger protein 217; C6orf172, chromosome 6 open reading frame 172 , IBR domain containing 1 , IBRDC1; probable E3 ubiquitin-protein ligase RNF217; dJ84N20.1; MGC26996; IBR domain containing 1; IBR domain-containing protein 1; IBRDC1; C6orf172; |
| <b>Gene ID</b>         | 154214                                                                                                                                                                                                                                                           |
