

Recombinant bFGF agarose fast flow

Cat. No. bFGF-10A **Lot. No.** (See product label)

SPECIFICATION

Product Overview	The bFGF agarose fast flow is produced by introducing rh-bFGF functional groups onto the cross-linked agarose matrix. It is designed for the purification of drug molecules which can bind to rh-bFGF from traditional Chinese medicine, making identification of traditional Chinese medicine more efficient.
-------------------------	--

Cat.no	bFGF-10A
---------------	----------

Matrix	Highly cross-linked 6% agarose
---------------	--------------------------------

Functional group	bFGF
-------------------------	------

Average particle size	45-165 μm
------------------------------	----------------------

Ligand concentration	0.25-1.0 mg/ml
-----------------------------	----------------

Recommended flow rate	50-150 cm/h
------------------------------	-------------
