

TargetLock Protein A Beads

Cat. No. Protein A-33A **Lot. No.** (See product label)

SPECIFICATION

Product Overview

The origin of protein A is from the bacteria *Staphylococcus aureus*. Protein A is capable of binding most classes and subclasses of immunoglobulins from Goat, Rabbit, Mouse and Human. Our Protein A beads are produced using genetically engineered form of Protein A. Nonessential regions have been removed while leaving the immunoglobulins binding sites intact. The recombinant Protein A has been immobilized to Sepharose beads using proprietary TargetLock chemistry, in order to create a winner product for the affinity purification and immunoprecipitation of various mammalian immunoglobulins.

Cat.no Protein A-33A

Matrix Highly cross-linked spherical agarose, 4%

Average particle size 40-165 μm

Dynamic binding capacity ~4-8 mg rabbit IgG per ml of resin

Recommended flow rate 1-3 ml/min/ cm^2

pH working range 2-11

Elution buffer 0.1M glycine buffer adjusted pH to 2.8 by acetic acid
