

Aromatic polymer adsorbent resin

Cat. No. Aromatic polymer-39A **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Aromatic polymer adsorbent resin is a macroreticular, non-functionalised adsorbent resin designed for the juice processing market where local regulations allow for such use. It can also be used for a wide variety of food processing applications to both recover high value materials and to purify and decolourise food and food additive streams.
-------------------------	---

Cat.no	Aromatic polymer-39A
---------------	----------------------

Matrix	Macroreticular aromatic polymer
---------------	---------------------------------

Average particle size	0.600 - 0.750 mm
------------------------------	------------------
