

Recombinant Human APOE protein

Cat. No. APOE-257H Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant Human APOE was expressed in E. coli.
Species	Human
Source	E.coli
ProteinLength	299 amino acids
Description	The protein encoded by this gene is a major apoprotein of the chylomicron. It binds to a specific liver and peripheral cell receptor, and is essential for the normal catabolism of triglyceride-rich lipoprotein constituents. This gene maps to chromosome 19 in a cluster with the related apolipoprotein C1 and C2 genes. Mutations in this gene result in familial dysbetalipoproteinemia, or type III hyperlipoproteinemia (HLP III), in which increased plasma cholesterol and triglycerides are the consequence of impaired clearance of chylomicron and VLDL remnants. Alternative splicing results in multiple transcript variants.
Form	Purified, Lyophilized
Molecular Mass	34 kDa
Purity	>90% pure (SDS-PAGE and HPLC analysis)
Notes	Small volumes of Apo E3 recombinant protein may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly

centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container's cap. Certain products may require to ship with dry ice.

Storage

Store lyophilized product at -20 centigrade. After reconstitution, aliquot and store at -20 centigrade. Avoid multiple freeze/thaw cycles.

Concentration

Lot specific (prior to lyophilization) (lot specific)

GENE INFORMATION

Gene Name

APOE apolipoprotein E [Homo sapiens]

Official Symbol

APOE

Synonyms

APOE; apolipoprotein E; AD2, Alzheimer disease 2 (APOE*E4 associated, late onset); apo-E; apolipoprotein E3; AD2; LPG; LDLCQ5; MGC1571;

Gene ID

348

mRNA Refseq

NM_000041

Protein Refseq

NP_000032

MIM
UniProt ID

P02649

**Chromosome
Location**

19q13.31

Pathway

Alzheimers disease, organism-specific biosystem; Alzheimers disease, conserved biosystem; Chylomicron-mediated lipid transport, organism-specific biosystem; HDL-
