SPECIFICATION

Product Overview	Recombinant Human PRKCD(Met1-Asp676) fused with His tag at C-terminal was expressed in HEK293.
Species	Human
Source	HEK293
ProteinLength	1-676 a.a.
Description	Protein Kinase C Delta Type (PRKCD) is a member of the AGC Ser/Thr protein kinase family of protein kinase superfamily. PKC family members phosphorylate a variety of protein targets and are known to be involved in diverse cellular signaling pathways. Each member of the PKC family has a specific expression profile and is believed to play distinct roles in cells. PRKCD serves as a major receptor for phorbol esters, a class of tumor promoters. PRKCD is involved in B cell signaling and in the regulation of growth, apoptosis, and differentiation of a variety of cell types.
