

Recombinant Human ANGPTL3 protein, His-tagged

Cat. No. ANGPTL3-32H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human ANGPTL3, fused to His-tag at N-terminus, was expressed in E.coli.
Species	Human
Source	E.coli
Description	ANGPTL3 also known as Angiopoietin-related protein 3 is a member of the angiopoietin-like family of secreted factors. It is expressed predominantly in the liver, and has the characteristic structure of angiopoietins, consisting of a signal peptide, N-terminal coiled-coil domain, and the C-terminal fibrinogen (FBN)-like domain. The FBN-like domain in angiopoietin-like 3 protein was shown to bind alpha-5/beta-3 integrins, and this binding induced endothelial cell adhesion and migration. This protein may also play a role in the regulation of angiogenesis.
