

Recombinant Human Muscle RAS Oncogene Homolog, His-tagged

Cat. No. MRAS-1335H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human MRAS protein, fused to His-tag at N-terminus, was expressed in E.coli and purified by using conventional chromatography techniques.
Species	Human
Source	E.coli
Description	MRAS (Ras-related protein M-Ras) belongs to the RAS superfamily. These families are membrane-anchored, intracellular signal transducers responsible for a variety of normal cellular functions. They are oncogenically activated in a significant fraction of tumors. MRAS serve as an important signal transducer for novel upstream stimuli in controlling cell proliferation.
