

Recombinant Human ADORA3

Cat. No. ADORA3-26898TH **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant fragment corresponding to amino acids 121-225 of Human Adenosine A3 Receptor with N terminal proprietary tag; predicted MW: 37.18 kDa, inclusive of tag. P33765, AAH29831.
Species	Human
Source	Wheat Germ
ProteinLength	105 amino acids
Description	This gene encodes a protein that belongs to the family of adenosine receptors, which are G-protein-coupled receptors that are involved in a variety of intracellular signaling pathways and physiological functions. The receptor encoded by this gene mediates a sustained cardioprotective function during cardiac ischemia, it is involved in the inhibition of neutrophil degranulation in neutrophil-mediated tissue injury, it has been implicated in both neuroprotective and neurodegenerative effects, and it may also mediate both cell proliferation and cell death. Multiple transcript variants encoding different isoforms have been found for this gene.
Molecular Weight	37.180kDa inclusive of tags
