

Recombinant Mouse Mkl protein, His-tagged

Cat. No. MLKL-9880M **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Mouse Mkl(1-472aa) fused with His tag was expressed in HEK293.
Species	Mouse
Source	HEK293
ProteinLength	1-472aa
Description	This gene belongs to the protein kinase superfamily. The encoded protein contains a protein kinase-like domain; however, is thought to lack protein kinase activity. This protein plays a critical role in tumor necrosis factor (TNF)-induced necroptosis, a programmed cell death process, via interaction with receptor-interacting protein 3 (Rip3), which is a key signaling molecule in necroptosis pathway. Knockout of this gene in mice showed that it is essential for necroptosis. Alternatively spliced transcript variants have been found for this gene.
Form	Tris-based buffer,50% glycerol
Molecular Mass	56.3kD
