SPECIFICATION

Product Overview	Recombinant full length protein, corresponding to amino acids 1-321 of Human Annexin IV with 6x His tag expressed in HEK293E cells; 327aa with tag, 36.1kDa (without tag).Protein Accesion:

Description	Annexin IV (ANX4) belongs to the annexin family of calcium-dependent phospholipid binding proteins. Although their functions are still not clearly defined, several members of the annexin family have been implicated in membrane-related events along exocytotic and endocytotic pathways.ANX4 has 45 to 59% identity with other members of its family and shares a similar size and exon-intron organization.Isolated from human placenta, ANX4 encodes a protein that has possible interactions with ATP, and has in vitro anticoagulant activity and also inhibits phospholipase A2 activity.ANX4 is almost exclusively expressed in epithelial cells.
