

Recombinant Human ATOX1, His-tagged

Cat. No. ATOX1-26191TH **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant full length Human ATOX1 with N terminal His tag; 88 amino acids with a predicted MWt 9.5kDa including tag.
Species	Human
Source	E.coli
ProteinLength	68 amino acids
Description	This gene encodes a copper chaperone that plays a role in copper homeostasis by binding and transporting cytosolic copper to ATPase proteins in the trans-Golgi network for later incorporation to the ceruloplasmin. This protein also functions as an antioxidant against superoxide and hydrogen peroxide, and therefore, may play a significant role in cancer carcinogenesis. Because of its cytogenetic location, this gene represents a candidate gene for 5q-syndrome.
Conjugation	HIS
Molecular Weight	9.500kDa inclusive of tags
Tissue specificity	Ubiquitous.
Form	Liquid
Purity	>95% by SDS-PAGE
