

Recombinant Human AURKA, His-tagged

Cat. No. AURKA-27420TH **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant full length human Aurora A fused to His tag at N-terminus; amino acids 1-403 , 47.9kDa.
Species	Human
Source	E.coli
ProteinLength	1-403 a.a.
Description	The protein encoded by this gene is a cell cycle-regulated kinase that appears to be involved in microtubule formation and/or stabilization at the spindle pole during chromosome segregation. The encoded protein is found at the centrosome in interphase cells and at the spindle poles in mitosis. This gene may play a role in tumor development and progression. A processed pseudogene of this gene has been found on chromosome 1, and an unprocessed pseudogene has been found on chromosome 10. Multiple transcript variants encoding the same protein have been found for this gene.
Conjugation	HIS
Tissue specificity	Highly expressed in testis and weakly in skeletal muscle, thymus and spleen. Also highly expressed in colon, ovarian, prostate, neuroblastoma, breast and cervical cancer cell lines.
Form	Liquid
