

Recombinant Human BATF, His-tagged

Cat. No. BATF-26167TH **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant full length Human BATF with an N terminal His tag; 145 amino acids, predicted MWt 16.2kDa inclusive of tag.
Species	Human
Source	E.coli
ProteinLength	125 amino acids
Description	The protein encoded by this gene is a nuclear basic leucine zipper protein that belongs to the AP-1/ATF superfamily of transcription factors. The leucine zipper of this protein mediates dimerization with members of the Jun family of proteins. This protein is thought to be a negative regulator of AP-1/ATF transcriptional events.
Conjugation	HIS
Molecular Weight	16.200kDa inclusive of tags
Tissue specificity	Expressed at highest levels in lung, and at lower levels in placenta, liver, kidney, spleen, and peripheral blood. Detected in SW480 colorectal cancer cell line and several hematopoietic tumor cell lines, including Raji Burkitts lymphoma. Strongly express
Form	Liquid
