

Recombinant Human CFTR

Cat. No. CFTR-27241TH **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant fragment of Human CFTR (amino acids 1381-1480) with N terminal proprietary tag, 36.63kDa.
Species	Human
Source	Wheat Germ
ProteinLength	100 amino acids
Description	This gene encodes a member of the ATP-binding cassette (ABC) transporter superfamily. ABC proteins transport various molecules across extra- and intra-cellular membranes. ABC genes are divided into seven distinct subfamilies (ABC1, MDR/TAP, MRP, ALD, OABP, GCN20, White). This protein is a member of the MRP subfamily that is involved in multi-drug resistance. The encoded protein functions as a chloride channel and controls the regulation of other transport pathways. Mutations in this gene are associated with the autosomal recessive disorders cystic fibrosis and congenital bilateral aplasia of the vas deferens. Alternatively spliced transcript variants have been described, many of which result from mutations in this gene.
Molecular Weight	36.630kDa inclusive of tags
Tissue specificity	Found on the surface of the epithelial cells that line the lungs and other organs.
