Biological Activity	The specific activity was found to be 18 U/mg. One Unit oxidizes one micromole of uric acid per minute at 30°C, at pH 8.9.
Solubility	It is recommended to reconstitute the lyophilized UOX in sterile 18 MΩ-cm H ₂ O not less than 100 g/ml, which can then be further diluted to other aqueous solutions.
Stability	Lyophilized UOX although stable at room temperature for 3 weeks, should be stored desiccated below -18°C. Upon reconstitution UOX should be stored at 4°C between 2-7 days and for future use below -18°C. Please prevent freeze-thaw cycles.
